Welcome to Accelerate 2020, Gamers! Click "Join this Game". To modify your player name or avatar, go to your My Account page at https://google.qwiklabs.com Start taking the game labs one by one to score points. Points are earned by completing the steps in the lab.... and bonus points are earned for speed! Be sure to End each lab to get the maximum points. This game consists of two different types of labs: Cookbook and Challenge labs. Cookbook labs will walk you through the lab, step by step and are worth 100 points. Challenge labs will give you a technical scenario to complete, but do not provide the step by step instructions to complete the lab. Due to this, Challenge labs are worth 200 points.

Be Googley and work within the GCP resource quotas that have been allocated. Otherwise, you'll waste game time and get fewer of the possible points. Your goal here is to HAVE FUN! while learning and gaining credibility with the content delivered in the Technical Tracks which you've learned about in the Accelerate 2020 Tech Track breakout sessions. If you already have a score before you start taking labs, then congratulations, those are your bonus points for diligently doing the prerequisite labs!!

Complete every activity in this game to earn a badge. Collect badges across Qwiklabs by completing quests and games. Collect them all and show off those skills!
